Specialty Metals for Cutting Edge Aerospace & Defense Applications

At *Tech Steel & Materials*, we supply the specialty metals today's high-performance applications demand. Count on us to meet your toughest challenges, tightest time frames and most exacting performance specifications. On the front lines of research and development, Tech Steel & Materials delivers the high-tech materials today's aerospace & military applications demand – on time, every time.

Core Competencies

 Forgings to create the high-strength, high-performance parts used in the aerospace, defense and power generation industries. We create forged parts in varying shapes, sizes and intricacies.

 Heat treating to achieve the desired strength, hardness, ductility, malleability and similar properties of both metals and their alloys.

 Profiling that meets your most exacting specifications.

 Precision grinding that enables us to create parts of specific size and tolerances as well as Blanchard/double disc that simultaneously grinds two sides of flat stock.

 Drilling and trepanning to create custom tubing from virtually any metal or alloy bar.

 Saw cutting that results in a metal bar with a quality finish, precise cut-to-length and high level

Company Snapshot

Government POC: John Tomory
 **Phone:** (631) 218-0013
 **Fax:** (631) 218-0141
 **E-Mail:** John@TechSteel.net
 **Address:** 1121 Lincoln Avenue
Holbrook, NY 11741

NAICS & PSC Codes

423510: Metal Service Centers & Other Metal Merchant Wholesalers
9510: Bars and Rods
9530: Bars and Rods, Nonferrous
9515: Plate, Sheet, Strip, Foil, & Leaf
9535: Plate, Sheet, Strip, & Foil; nonferrous base metal
