

Welcome to GEA Southern and Eastern Africa

Your partner for world-leading
process technology

[gea.com](https://www.gea.com)

GEA – “engineering for a better world”

GEA is one of the largest suppliers for the food processing industry and a wide range of other industries. The international technology group focuses on process technology and components for sophisticated production processes in various end-user markets.

In 2016, GEA generated consolidated revenues of about EUR 4.5 billion. The food and beverage sector, which are long-term growth industries, accounted for approx. 70 percent. The group employs about 17,000 people worldwide.

GEA is a market and technology leader in its business areas. The company is listed on the German MDAX stock index (G1A, WKN 660 200) and included in the STOXX® Europe 600 Index. In addition, the company is listed in selected MSCI Global Sustainability Indexes. The CSR Report 2016 was drawn up in line with the international G4 Guidelines of the Global Reporting Initiative (GRI).

We strive to be the world’s leading global engineering group, supplying smart solutions for sophisticated process industries. Our goal is to be the customer’s preferred partner in the industries we serve.

Approx. one quarter of processed milk comes from GEA production systems.

Around every third process line for instant coffee was installed by GEA.

Every third chicken nugget is produced by GEA technology.

Approx. every second liter of beer is brewed with the aid of systems and process solutions from GEA.

Welcome to your country organization: GEA Southern and Eastern Africa

GEA Southern and Eastern Africa looks back on a company's history in the region, starting in 1962. Today we boast a staff of about 350 people servicing the sub-Saharan market, with branches located throughout South Africa, Namibia, Kenya and Tanzania. At GEA Southern and Eastern Africa, we draw on local expertise to offer our customers the very latest technologies in equipment solutions and service support tailored to their specific needs:

- Equipment sales for the beverage industry, dairy farming and milking, refrigeration technologies, food processing and packaging, as well as many

non-food markets like pharmaceutical, personal care, pulp and chemical markets.

- Process engineering solutions across a variety of agricultural, food and non-food related markets, including applications in beverage, dairy farming, dairy processing, food, oil and gas, cold storage, chemicals, pharma and associated utilities, including: refrigeration, steam, compressed air and electrical reticulation.
- Service for all markets and applications highlighted above, through an extensive branch network throughout Southern and Eastern Africa

with more than 130 field service engineers. We offer comprehensive after-sales support including: Service Level Agreements (SLA's), pro-active and reactive maintenance and repairs, small projects/ upgrades and modernization, equipment overhaul/rebuilds, spare parts, hygiene (cleaning) products and lubricants.

- Transport cooling for the supply and maintenance of transport cooling solutions and the supply and maintenance of Thermo King transport refrigeration units and Dhollandia mechanical tail lift for the transport industry.

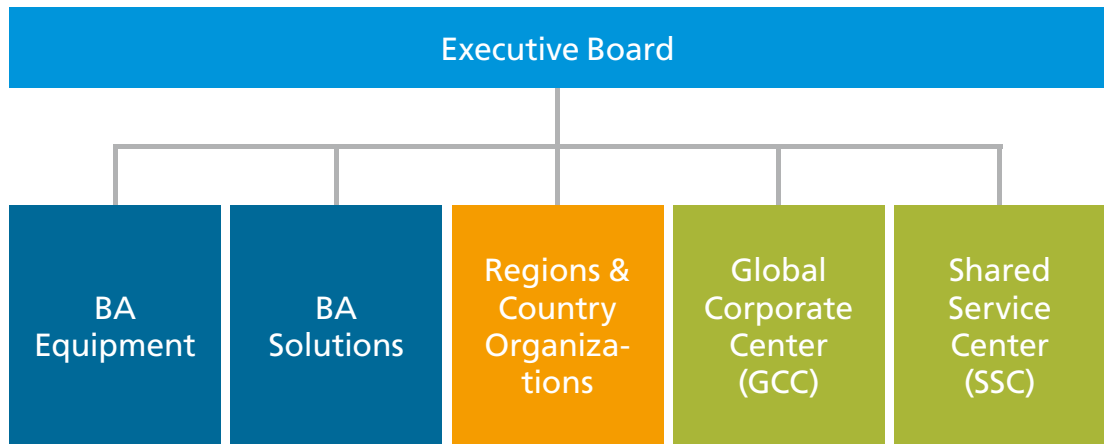

GEA has a dedicated Health, Safety and Environmental Department committed to the implementation, management and monitoring of best practice, ensuring the safety of our employees.

To secure the best value creation from your plant and every single piece of equipment in it, we have developed a holistic service concept to sustain and optimize your equipment throughout its life cycle.

A team of experienced Field Service Engineers and specialists is never far away from you, wherever you are in our region, 24 hours a day, 365 days a year.

GEA – always close to our customers

Country organizations

Customer-centric sales and service activities are unified under the umbrella of a single country organization. The countries are grouped together in specifically defined regions. GEA's customers have a single national organization per country as the central point of contact offering the entire product portfolio and all services on a local basis.

Business Areas

GEA bundles the development and manufacturing of products and the provision of process solutions and services in two operating segments, namely Business Area (BA) Equipment and Business Area Solutions. This structure with two business areas of roughly equal size and strength promises operational synergies across technologies and applications, and helps achieve functional excellence by standardizing processes.

The Business Area Equipment brings together all activities ranging from largely standardized to customer-specific equipment offerings. The products are mainly manufactured as part of series production on a standardized and modular basis. Typical products of the business area include separators, valves, pumps, homogenizers, and refrigeration equipment such as compressors. The portfolio of equipment also includes process technology for food processing and packaging. The product range also extends to dairy equipment, feeding systems, and slurry engineering.

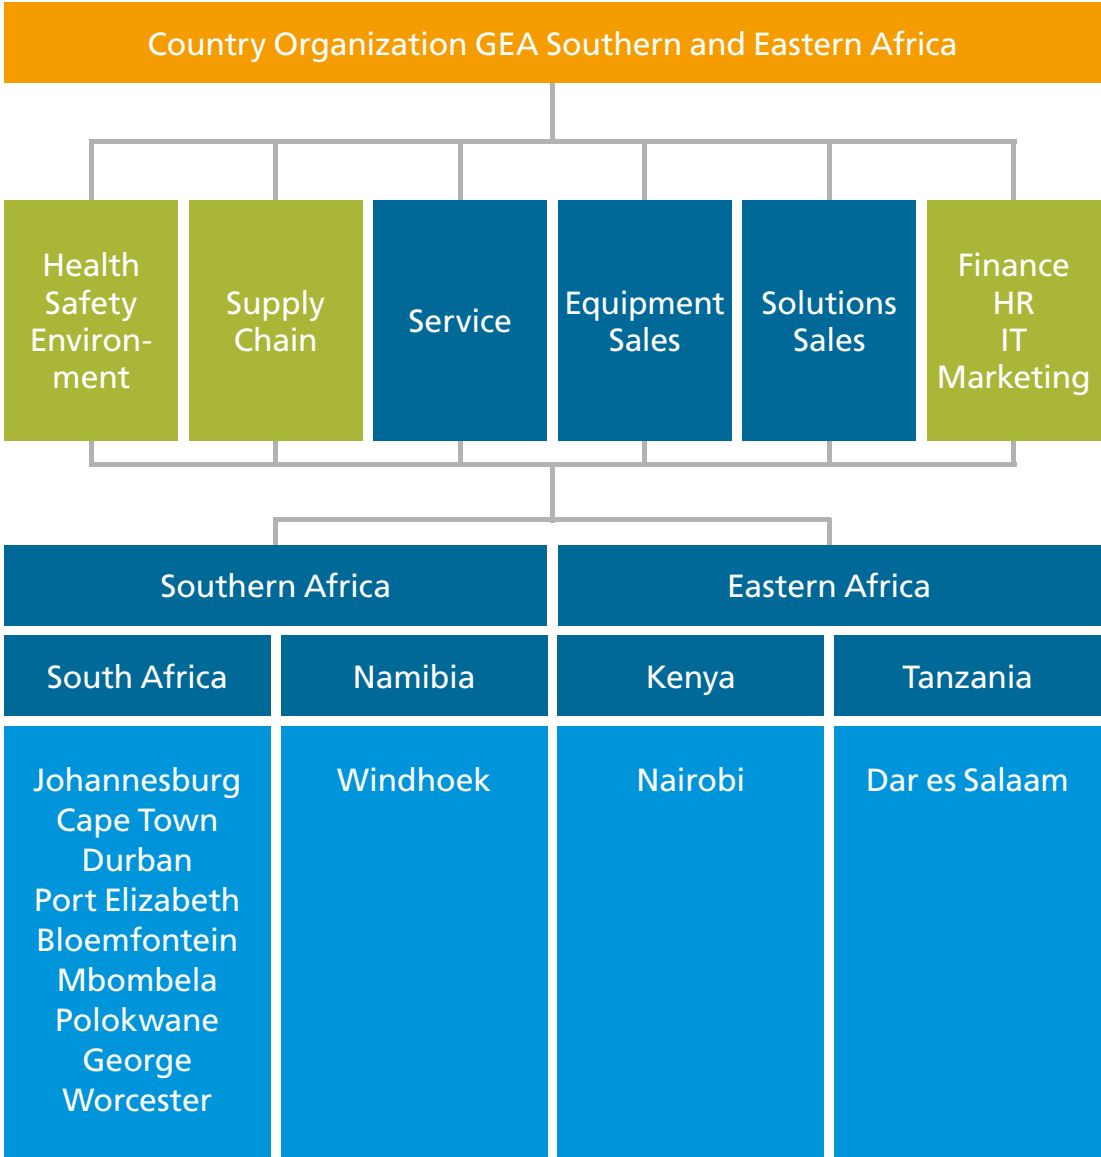

The Business Area Solutions combines all group activities that largely consist of customer-specific and modular solutions provided within the scope of projects. This business area tailors its products and services to the specific application or customer requirements. The offering mainly comprises the design and development of process solutions for the dairy processing, baking, brewing, food, beverages, pharma, and chemical industries.

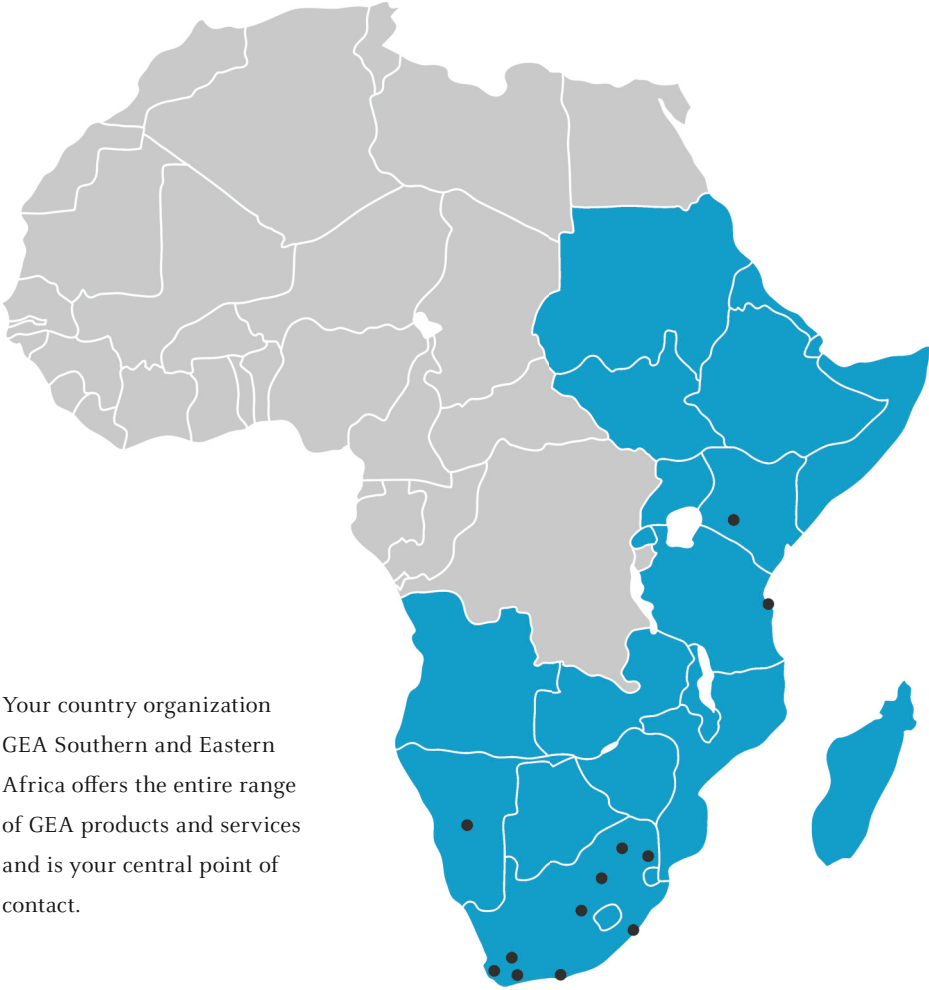

Administration

A Global Corporate Center (GCC) is the central port of call for all supporting management and administrative functions. A Shared Service Center (SSC) with two locations takes care of the standardized administrative processes, thus reducing the workload for the operating units.

Ultimately, the structure of the group allows customers to obtain equipment, solutions and service of the highest quality with some of the best professional support in the industry from one source.

GEA Southern and Eastern Africa – your central point of contact

Your country organization
GEA Southern and Eastern
Africa offers the entire range
of GEA products and services
and is your central point of
contact.

Customized solutions for demanding needs

Food

Our food processing and packaging portfolios add value to food products sold in supermarkets, quick-serve restaurants and food service locations around the world.

Dairy Processing

Turn to our industry-leading experience, expertise and technologies for processing milk and every type of milk-based product.

Dairy Farming

We are the total solutions provider empowering dairy farmers around the globe to successfully manage their future.

Beverages

We are a leader in providing the technological expertise required to help beverage producers quench the global thirst.

Land-based Transportation

Our advanced compressor technology keeps public transportation cool and refrigerated freight fresh.

Pharma

We are a single-source supplier of manufacturing solutions that maximize reliability and productivity for the life science industries.

Chemical

We supply world-class precision engineering the industry needs to develop new products, control costs and protect the environment.

Marine

Our technology and global network for service and parts supports the shipping industry from fishing to freight, and tourist to tanker.

Leisure and Sport

Our ice-making machines bring snow to the desert and arctic conditions to zoos for the comfort of polar bears and penguins.

Utilities

Each industry we serve utilizes GEA's industrial refrigeration technologies. We provide sustainable solutions that reduce both your energy consumption and carbon footprint.

Infinite possibilities

Automation and Control Systems

From process automation and machine control to data capture systems, GEA can provide tailor-made solutions for process plants and complete production lines.

Bakery Lines

Our capability extends from key single components to integrated production lines for cake, pie, cookies, pastry and bread.

Beverage Plants

Our extensive range of beverage production systems includes product processing, UHT treatment, aseptic filling, blow molders and container handling for all kinds of beverages.

Brewery Plants

Uniquely qualified to build brewery plants, we are capable of providing solutions down to the smallest detail of the brewing process.

Cleaners and Sterilizers

We supply both manual and fully automated clean-in-place (CIP) and sterilize-in-place (SIP) solutions that ensure reliable process outcomes with minimal downtime.

Distillation and Fermentation Systems

Our detailed knowledge of distillation and fermentation processes allows us to recommend and provide equipment that meets every need.

Dryers and Particle Processing Plants

Our wide range of plant capacities includes small-scale pilot plants for research and product development as well as large-scale industrial installations.

Emission Control Systems

Reducing emissions is in everybody's interest. We are a world leader in developing, designing and installing emissions reduction systems.

Innovative solutions

Evaporators and Crystallizers

We have extensive experience in designing evaporation and crystallization plant to concentrate liquids, remove by-products or impurities and produce pure, high quality crystals.

Flow Components

To ensure a smooth production we offer a full range of valve, pump and cleaning technology.

Filling and Packaging Systems

We design systems to fill and package food and renewables, beverages, dairy products and pharmaceuticals.

Food Processing and Packaging

We supply a multifaceted product portfolio of secondary food processing and packaging equipment that covers everything from individual, stand-alone machines to completely integrated processing lines.

Homogenization Solutions and Systems

High-pressure homogenizers are used to micronize fluid particles to obtain stable and uniform emulsions. From the laboratory to industrial-scale production, GEA equipment covers a wide range of customer applications.

Liquid Food Systems

We offer specialized equipment and solutions for the production of many different liquid foodstuffs, including soups, sauces and nutritional products.

Liquid Processing Systems

Systems for liquid processing are a GEA core competency. Our equipment and solutions ensure maximum production safety and hygiene.

Membrane Filtration Systems

We are a world leader in custom designed, cross-flow membrane filtration. This is the technology of choice for many industrial processes involving the separation and concentration of liquids without applying heat.

Customer-inspired

Pharmaceutical Systems

As a global specialist in solid and liquid dose technology, our expertise covers batch and continuous granulation, drying, pelletizing and coating, contained materials handling, tablet compression, freeze drying, fermentation, separation, homogenization and cell disruption. We supply the pharmaceutical, nutraceutical and personal care sectors with components, equipment and entire plants to process solid, liquid, semi-solid, viscous, hazardous and hygroscopic products.

Product Handling Systems

The careful handling of our customers' products requires a complete range of standard and customized equipment to deal with products as diverse as powders, liquids, foodstuffs and tablets.

Refrigeration Solutions and Systems

We are refrigeration experts. Our wide portfolio includes chillers, compressors, freezers and heat pumps that span the entire cold chain.

Systems for Milk Production and Livestock Farming

GEA's total solutions in Dairy Farming provide complete integrated dairy systems with lifetime care for a high value partnership. Our portfolio includes automatic and conventional milking, automatic feeding, cooling, herd management, hygiene products, barn equipment as well as solutions that support professional manure management and the proper care of young stock.

Separation Solutions and Systems

Our centrifuges combine high separating and clarifying efficiencies as well as high throughput capacities with maximum savings in terms of energy, water and disposal costs.

Vacuum Systems

Vacuum technology is used extensively in the chemical, pharmaceutical, food and oil-refining industries. Our process-integrated systems reduce both costs and environmental pollution.

GEA – your service partner

GEA Service – For your continued success

Working with GEA Service means partnering with a dedicated team of service experts. Our focus is to build, maintain, and improve customer performance throughout the entire life cycle of the plant or farm and its equipment.

Beginning of Life Services

Getting you started with seamless support for instant productivity and performance.

Lifetime Services

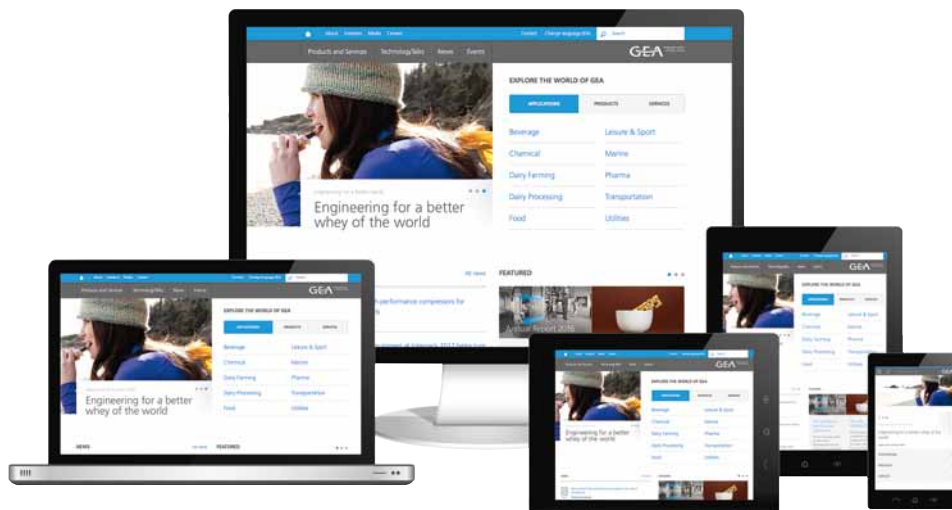

Keeping it running with the cost-efficient way of ensuring peak safety and reliability.

Extended Life Services

Constantly improving by sharing our knowledge to safeguard our customers' investment.

Consulting Services & Operations

Together with you by enduring commitment to our customers and their business.
